🧠 SKILLS

Programming Languages

- Python
- C++
- Java

Frameworks

- React
- Nodejs
- Expressjs
- Nestjs

Databases

- MySQL
- MongoDB

Tools

- Git
- GitHub
- VS Code

Mathematics

- Statistic and Probability
- Linear Algebra
- Numerical Method

Mobile Development

- Flutter

📄 ABOUT ME

I am a Third Year Computer Science & Engineering student at the University of Moratuwa with a passion for software engineering. I believe in the transformative power of technology and eager to apply my academic knowledge in real-world scenarios. My goal is to gain valuable industry experience, enhance my skills, and contribute meaningfully to innovative projects. As I take my first steps into the professional world, and committed to learning, problem-solving, and making a positive impact through technology.

🎓 EDUCATION

University of Moratuwa

2021 – present | Sri Lanka

- Undergraduate, BSc Engineering (Hons) | Computer Science and Engineering

Ananda College - Colombo 10

2011 – 2019

- G.C.E. (A/L) Examination |2020 - 3As - Physical Science Stream
- G.C.E. (O/L) Examination |December 2016 - 8As, 1B

📁 PROJECTS

Theatre Reservation System

A comprehensive web application designed to facilitate seat booking for theaters. The system offers a user-friendly interface that allows users to browse and reserve seats, and includes a dynamic admin dashboard to manage reservations, shows, and seating arrangements. The project emphasizes usability with an intuitive UI and supports various reporting features, making it easy for admins to generate sales, revenue, and popular show reports.

• Contribution:

- Frontend and backend development, including the creation of the admin dashboard and dynamic report generation.
- Managed backend development and APIs using a microservices architecture.
- Led the project as a Project Manager and Developer.

• Programming Languages/Frameworks/Tools:

- React, Node.js, Nest.js, MongoDB

MangoMap

A cross-platform app for iOS and Android built using Flutter, offering fast development with hot reload and high performance through native ARM code compilation. MangoMap features an expressive, flexible UI, enabling users to share travel reviews and photos to inspire and guide fellow travelers.

• Contribution:

- Created MySQL ER diagram and designed high-level API routes.
- Developed UI pages for settings and map functionality after search.
- Integrated company registration UI with the backend.

• Programming Languages/frameworks/Tools:

- Flutter, Node.js, Express.js, MySql, Figma

INTERESTS

- Playing Musical Instruments
- Singing
- Project Management
- Critical & Logical Thinking
- Making Predictions
- Self-Development
- Watching Movies
- Blogging
- Chess

Mora UXplore

This web application serves as the backbone of the MoraUXplore Competition organized by the IEEE Student Branch at the University of Moratuwa. It provides a platform for user registration, authentication, answer submission, and real-time chat functionality. The app enables organizers to communicate with participants, track their progress, and announce winners efficiently.

• **Contribution:**

- **Frontend:** Developed the user-friendly contacts page and admin dashboard.
- **Backend:** Implemented the backend for managing static content and administrative tasks.

• **Programming Languages/Frameworks/Tools:**

- React, Node.js, Express, JavaScript

E-Commerce Platform

This project is a full-stack implementation of a single vendor e-commerce platform for a local chain retailer. The platform focuses on consumer electronics and toys in its initial phase, supporting detailed product variants, inventory management, and a comprehensive reporting system for monitoring and analytics.

- **Contribution:** Developed the backend Entity-Relationship (ER) Diagram and wrote most SQL queries, ensuring data management.
- **Programming Languages/Tools:** SQL, React, Node.js, Express.js

Nano Processor

Designed and implemented an 8-bit nanoprocessor using VHDL for arithmetic, shift, and logical operations. Integrated memory for data storage and executed simple assembly code. Developed with Xilinx ISE and tested on a Basys3 FPGA board.

- **Programming Languages/Tools:** VHDL, Vivado

LEADERSHIP & SOCIETY

Department of Computer Science - Events
